## Projects

### GRADUATION PROJECT(PARROTYO) Mobile App

*El-Shorouk Academy | 2022*

- A mobile application that can convert audio to written text made using an AI model (python), CNN, MFCC, and Flutter in the frontend part
- Project grade: A

### RESUME BUILDER

- This application enables you to create and download a CV, add, delete, modify data, and change locations and colors of the CV with ease, and all this with a simple and nice interface for the user. This app uses React, react-to-print, react-feather, react-dom

### CHAT APP

- This application is a Live chat through which you can send messages to another person, change the profile picture, and add people to the conversation, and I used Firebase to register, log in, and store data, in addition to using react-router-dom, React

### REACT WEATHER SYSTEM

- A real system to know the current and future weather made using HTML, CSS, Bootstrap, JS, React.js, Fake API, axios, and react-dom

### GAME REVIEWS WEBSITE

- A website that displays many games through a real API and also displays the details of each game, including pictures, download links, and ratings

### **YUMMY WEBSITE**

- A site that displays many dishes, divided into countries, categories, ingredients, and all of that made using real API with regex in contact us
